

KISSsoft Event In Spain

Date	Sep 29,2026 08:30-17:30 (CEST)	€150 per Person
Location	Bilbao, Bizkaia SPAIN	
Language	Spanish	
Level	Special (Basic KISSsoft knowledge recommended)	
Provider	Iván Sarabia Martínez (Gear Transmisssion Solutions, GearTS) Giuseppe Sciarra (KISSsoft AG)	
Duration	1 day incl. breaks and lunch	
Number of Participants	Minimum 20	

Participate in the KISSsoft event we are preparing for engineers, designers and industry leaders, and discover or widen your knowledge about the potential of our KISSsoft System Module (KSM). We will also update you on the latest advances and developments of KISSsoft that are already available in the latest versions of the program.

Location:

Escuela de Ingeniería de Bilbao
Paseo de Rafael Moreno 'Pitxitxi' 2
48013 Bilbao, Bizkaia
SPAIN

Date and Time:

September 29, 2026: CEST 8:30 – 17:30

Topics

The event will start with a general presentation of the KISSsoft System Module (KSM) interface. After that a model of a two-stage parallel gearbox will be built up from zero and positioned in space using the tools and functionalities available in KISSsoft and KSM. Finally, the most advanced modules available at the system level will be reviewed:

- parameter variation and maps
- power losses
- thermal rating
- housing stiffness
- dynamics calculations

In the second part of the meeting, the main developments created by the KISSsoft AG team for the latest releases of the program will be shown, paying special attention to:

- Cylindrical gear manufacturing simulation and tooling design
- Advanced plain journal bearing calculations
- REXS interface
- Improvements in Script and COM interface

Registration:

Registration will close on September 10, 2026. Please fill out all the required information and submit your registration.
