

Software Engineer – C++ 80%-100%

To strengthen our development department at the headquarters of KISSsoft AG (Bubikon, CH) we are searching for a Software Engineer (d/m/f) with C++ expertise.

KISSsoft AG as part of the Gleason Group develops, distributes and trains a worldwide recognized CAE software for gear design, gear optimization and calculation of classic machine elements.

Your areas of responsibility are diverse: You develop, extend and maintain essential modules of our products and can independently and confidently realize all phases of software development (from requirements engineering to testing). You are the contact person for sales, support and technical specialists and actively contribute to second level support.

Your tasks:

- Development of new and enhancement of existind source code together with technical specialists
- Requirements engineering and design of new functionalities (on code and UI level)
- Active participation in the development process
- Second level support

Our requirements:

- Graduate degree in computer science or similar qualification
- Good knowledge in C++
- Good knowledge in OOD/OOP
- Recipient appropriate communication, entrepreneurial approach, independent learning
- Fluent in writing and speaking English

Additional pluses:

- Programming using COM
- QT, OpenGL, OpenMP/OpenCL
- REST, RPC, XML, JSON
- Numerical calculation methods

We also give beginners with the appropriate background a chance.

Interested? Then we look forward to receiving your application at benjamin.mahr@KISSsoft.com
