

# KISSsys Live Stream Training

Advanced: System Calculations

September 21-22, 2021

## Day 1 – September 21, 2021

08:30 – 08:40	Welcome, introduction
08:40 – 10:10	Efficiency and thermal analysis
10:10 – 10:30	Break
10:30 – 12:00	Load spectrum calculation
<b>Exercises</b>	<b>“Efficiency and load spectrum calculation”</b>
16:00 – 17:00	Questions

## Day 2 – September 22, 2021

08:30 – 08:40	Exercise follow up
08:40 – 10:10	Housing stiffness consideration
10:10 – 10:30	Break
10:30 – 12:00	Modal analysis, system dynamics
<b>Exercises</b>	<b>“Housing stiffness”</b> <b>“System dynamics”</b>
16:00 – 17:00	Questions

## Efficiency and Thermal Analysis

- Calculation of gear, bearing and churning losses
- Calculation of dissipation through housing and rotating parts
- Oil temperature over time

## Load Spectrum Template

- Definition of a spectrum in KISSsys
- Calculation with different options
- Checking the result data

## Housing Stiffness

- Theory
- Characteristics of a reduced stiffness matrix
- Reading in and calculating in KISSsys

## Modal Analysis

- Calculation of system eigenfrequencies
- Generation and evaluation of Campbell Diagram
